Clinical Range

Clinical Couches for Patient Examination and Minor Treatment Procedures

SEERSMEDICAL

Introduction

In this new brochure we cover our wide range of patient examination furniture for various medical procedures such as Gynaecology, Ultrasound, Phlebotomy, Lymphoedema and Podiatry. There is a wide choice of models and accessories to cater for various examination procedures as well as specialist treatment and minor operation techniques. Most models are variable in height with a choice of both manual or electric positioning and height operation. The development of these products has been achieved by applying our many years of experience and knowledge in this market. Much thought has been given to the design, to benefit both the comfort and security of the patients as well as providing manual handling solutions which promote good posture and ergonomics to all clinical staff when they are using this equipment. With the management and control of our own assembly line at our premises in Debenham, Suffolk in the UK, our couches comply to the CE medical devices directive 93/42/EEC, ensuring we supply high quality products every time, with short lead times to meet the tightest of deadlines. We trust you will experience this yourself when you purchase a **SEERS** Medical product. **SEERS Medical are ISO9001 and IS014001 accredited.**

Technical Information

At **SEERS** Medical we are using state of the art design tools, such as 3D solid modelling and in house rapid prototyping, to assist us in getting new designs into development and manufacture. Whilst designing new products, all manufacturing capabilities available are taken into consideration, such as CNC wood cutting, laser profiling and robot welding, which deliver reliable build quality and repeatability of accurate components, time after time. A typical innovative use of these processes is evident in a high loaded components such as the ram bracket, a common item on many **SEERS** couches, where using laser profiling we have been able to make the parts interlock, adding immense strength, even before welding! This is typical of the attention to detail that we pride ourselves with, and sets us apart from other couch manufacturers, giving us confidence in the reliability and longevity of the products we manufacture.

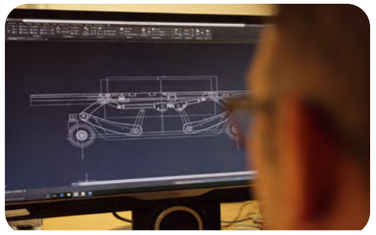

Mechanical Safety & Load Testing
All **SEERS** Medical products have been tested to the applicable EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. Our couches have been thoroughly tested with a two and a half times safe working load (in excess of 600Kg loaded evenly, for in excess of one hour, to prove load support capability without failure. Our products are tested in accordance to Clauses 9.8.3.2-3 Static Forces of EN60601-1:2006 Not only do our products have high safe working loads (typically 240Kg), but our products also lift the rated safe working load from the minimum height to the maximum height smoothly.

Electrical Safety
All **SEERS** Medical products comply to EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. In addition, the actuation and control systems used on our products are marked with the UL mark, demonstrating compliance to UL60601-1 and CAN/CSA-C22.2 No. 601.1-M90, meeting the requirements for USA and Canada. The actuation control system is also marked with approval to C-ETL-US No. 3154358.

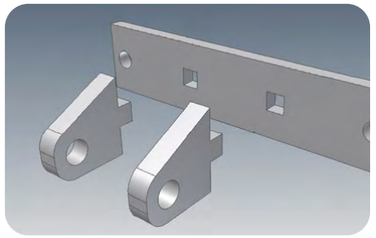

CE Marking & Quality System
SEERS Medical operates a Quality Management System in accredited and approved to ISO 13485:2016. **SEERS** Medical products comply with the Essential Requirements in Annex I of EC Directive 93/42/EC, with all relevant design, production records, risk assessments, product testing and labelling information recorded in the documentation file labelled the "Technical File". All products carry a unique serial number for trace-ability of build date, model number and associated build records.

Flammability
The upholstered couch sections satisfies flammability requirements to the standards of BS 7176:1995 (medium hazard) using ignition sources 0 (cigarette), 1 (gas) as defined in BS EN. 1921-1 and 2 and 5 (crib) BS 5852:1990.

Warranty
The variable height couches detailed in this brochure have a lifetime frame warranty and five years warranty on all other components.
