Introduction

In this new brochure we cover our range of physiotherapy and rehabilitation products. There is a wide choice of models and accessories to cater for various examination procedures as well as different manual therapy and rehabilitation techniques. Most models are variable in height with a choice of both manual or electric positioning and height operation. The development of these products has been achieved by applying many years of experience and knowledge in this market. Much thought has been given to the design, to benefit both the comfort and security of the patients as well as providing manual handling solutions which promote good posture and ergonomics to all clinical staff when they are using this equipment. With the management and control of our own assembly line at our premises in Debenham, Suffolk in the UK, our couches comply to the CE medical devices directive 93/42/EEC, ensuring we supply high quality products every time, with short lead times to meet the tightest of deadlines.

Technical Information

At SEERS Medical we are using state of the art design tools, such as 3D solid modelling and in house rapid prototyping, to assist us in getting ideas in development quickly into manufacture. Whilst designing new products, all manufacturing capabilities available are taken into consideration, such as CNC wood cutting, laser profiling and robot welding, which deliver reliable build quality and repeatability of accurate components, time after time. A typical innovative use of these processes is evident in a high loaded components such as the ram bracket, a common item on many SEERS couches, where using laser profiling we have been able to make the parts interlock, adding immense strength, even before welding! This is typical of the attention to detail that we pride ourselves with, and sets us apart from other couch manufacturers, giving us confidence in the reliability and longevity of the products we manufacture.

Mechanical Safety & Load Testing

All SEERS Medical products have been tested to the applicable clauses within IEC 60601-2-38 for mechanical safety and load test. Our couches have been thoroughly tested with a two and a half times safe working load (in excess of 600Kgs) loaded evenly, for in excess of one hour, to prove load support capability without failure. All products are tested in accordance to IEC 60601-2-38 Clause 28.4 Not only do our products have high safe working loads (typically 240Kg), but our products also lift the rated safe working load from the minimum height to the maximum height smoothly.

Electrical Safety

All SEERS Medical products comply to IEC 60601-1 Safety for Medical Electrical Equipment as well as meeting the requirements of EMC to the standards of EN 60601-1-2:2000 - Directive 2007/47/EC. In addition, the actuation and control systems used on our products are marked with the UL mark, demonstrating compliance to UL60601-1-2 and CAN/CSA-C22.2 No. 601.1-M90, meeting the requirements for USA and Canada. The actuation control system is also marked with approval to C-ETL-US No. 3154358.

CE Marking & Quality System

SEERS Medical operates a Quality Management System in accredited and approved to ISO 9001:2008. SEERS Medical products comply with the Essential Requirements in Annex I of EC Directive 93/42/EC, with all relevant design, production records, risk assessments, product testing and labelling information recorded in the documentation file labelled the “Technical File”. All products carry a unique serial number for trace-ability of build date, model number and associated build records.

Flammability

The upholstered couch sections satisfies flammability requirements to the standards of BS 2176:1995 (medium hazard) using ignition sources 0 (cigarette), 1 (gas) as defined in BS EN 1921:1 and 2 and 5 (crib) BS 5852:1990.

Warranty

The variable height couches detailed in this brochure have a 10 year structural frame warranty, 2 years on electric and hydraulic actuation, 2 years on gas struts and 12 months on all other components. (Further warranty details are available on request)
Therapy 2 Section Standard Head Couch

A very strong and rigid 2 section couch with a wide range of optional accessories, available in an extensive choice of colours. This couch is suitable for supporting very heavy patients for examinations, minor procedures and physio treatments. This 2 section couch is available as a hydraulic or electric model, both models feature a manual backrest that can be adjusted from -25˚ to +75˚ and has an excellent height range from 45cm to 98cm.

Models

ST2557  Hydraulic with manual backrest
ST2567  Electric with manual backrest

Standard Features

- Safe working load and lifting capacity of 240Kg (528lbs)
- The power assisted backrest section incorporates anti-trap design gas strut
- Backrest angle adjustment from -25˚ to +75˚
- Choice of hydraulic or electric height elevation
- Excellent height range from 45cm to 98cm
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Breathing hole and plug included as standard
- Purpose made precision bearings on all pivot points
- Clearance beneath frame for mobile hoist
- Hand switch fitted as standard on electric models
- Standard upholstery width of 65cm

Optional Accessories

- 6001  Perimeter Foot Switch
- 6200  Single Foot Switch
- 6339  Dual Foot Switch
- 6006  Upper Limb Support
- 6002  Side Support Rails
- 6002P  Side Support Rail Cushions
- 6005  Paper Roll Holder
- 6007  Removable Head/Knee Support
- 6053  Protective Base Shroud
- 6010  Couch Cover (Breathing hole) See Page 49
- 6011  Couch Cover (Without Breathing hole)

See page 54-55 for additional information on our range of optional accessories
Therapy 2 Section Basic Head Couch

Designed for head and neck mobilisation, as well as traction techniques, these strong and rigid tables feature a short head section, with the option of adjustable height armrests on the “Plus” model, providing additional patient comfort during prone treatments. The head section has a breathing hole and plug fitted as standard.

Models

- ST2558 Hydraulic with manual backrest
- ST2568 Electric with manual backrest

Standard Features

- Safe working load and lifting capacity of 240Kg (528lbs)
- The power assisted head section incorporates anti-trap design gas strut
- Head section angle adjustment from -25˚ to +40˚
- Choice of hydraulic or electric height elevation
- Excellent height range from 45cm to 98cm
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Breathing hole and plug included as standard
- Purpose made precision bearings on all pivot points
- Clearance beneath frame for mobile hoist
- Hand switch fitted as standard on electric models
- Standard width 65cm upholstery

Optional Accessories

- 6001 Perimeter Foot Switch
- 6200 Single Foot Switch
- 6239 Dual Foot Switch
- 6006 Upper Limb Support
- 6002 Side Support Rails
- 6002P Side Support Rail Cushions
- 6005 Paper Roll Holder
- 6007 Removable Head/Knee Support
- 6053 Protective Base Shroud
- 6010 Couch Cover (Breathing hole) See Page 49
- 6011 Couch Cover (Without Breathing hole)

See page 54-55 for additional information on our range of optional accessories

Model ST2557 Hydraulic model with manual backrest. Colour mandarine

Low patient transfer height

Negative head section to -25˚
Therapy 2 Section Plus Head Couch

The plus head design is ideal for neck mobilisation as well as other traction techniques and treatments. These couches feature a short head section with height adjustable armrests for prone treatments, promoting relaxed shoulders and a more comfortable patient. The couch has an excellent height range of 45cm to 98cm and is fitted with a breathing hole and plug as standard.

Model ST3566 with electric elevation. Colour dark blue

Couch in horizontal position

Negative head/foot section to -90˚
Therapy Deluxe Drainage Couch

The deluxe drainage couches have the same head section options as the standard 2 and 3 section therapy couches and also provide the option of having the backrest/foot section supplied in a split leg model for additional mobilisation techniques. The electric drainage facility can be operated on either side, via a simple push button hand switch mounted near the top frame. This facility provides angular adjustment to +25° at the hinge point of the mid and foot sections.

Models

ST3547  Standard head design
ST3547S  Standard head design with split leg
ST3548  Basic head design
ST3548S  Basic head design with split leg
ST3549  Plus head design with armrests
ST3549S  Plus head design with split leg

Standard Features

- Safe working load and lifting capacity of 240Kg (528lbs)
- Electric drainage facility to +25° between mid section and backrest
- Electric height operation via integral perimeter foot switch
- Excellent height range from 46cm to 99cm
- Adjustable angle backrest from horizontal to +90°
- Adjustable head section with positive and negative angle
- Power assisted backrest and head sections incorporate anti-trap design
- Choice of Standard, Basic or Plus head design with adjustable armrests
- Breathing hole and plug fitted as standard
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Purpose made precision bearings on all pivot points
- Standard width 65cm upholstery

Optional Accessories

6005  Paper Roll Holder
6007  Removable Head/Knee Support
6053  Protective Base Shroud
6100  Matching Operators Chair

Standard Features

- Safe working load and lifting capacity of 240Kg (528lbs)
- Integral rolling top design to provide effective application of traction forces
- Adjustable height mount for traction machine with offset positioning for changing angle of traction application
- Adjustable angle backrest from horizontal to +80°
- Adjustable angle head/foot section from -25° to +75°
- Head section includes breathing hole and plug
- Power assisted backrest and foot sections incorporate anti-trap design
- Choice of hydraulic or electric height elevation
- Excellent height range from 50cm to 101cm
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Fixation point for optional cervical traction accessory
- Purpose made precision bearings on all pivot points
- Hand switch fitted as standard on electric models
- Standard width 70cm upholstery

Optional Accessories

- 6200 Single Foot Switch
- 6071 Cervical In Sitting Accessory
- 6046 Pelvic Lumbar Traction Harness
- 6047 Thoracic Harness
- 6048 Thoracic Anchor Straps
- 6049 Cervical Traction Head Halter
- 6067 Cervical Pillow
- 6069 Flexion Stool
- 6070 Spreader Bar

See page 54-55 for additional information on our range of optional accessories
SM12 Traction Machine
A very versatile and easy to operate traction machine with both static and intermittent treatment modes. The SM12 Traction machine features variable speed control with clear displays of all treatment settings and is available separately or as part of a traction package with table and accessories.

Cervical In-sitting Accessory

Flexion Stool

Cervical Pillow

Therapy Bobath Couch

By tradition, Bobath treatment techniques require a suitably wide treatment surface with a safe and capable lifting capacity for both patient and therapist. The Bobath Therapy range of couches has more than achieved this with a choice of 2 sizes and higher than standard safe working load of 250Kg. See deluxe model for 325Kg safe working load.

ST2708 Lightweight Portable Couch

---

**Model ST2708 Lightweight portable couch. Shown with face cradle and arm support**

Carry case supplied as standard.
**Couch Cover (Breathing Hole)**
These made to measure stretch towelling covers provide an additional hygiene barrier between the patient and the upholstery surface, over time lengthening the life of the couches upholstery.

**Perimeter Foot Switch**
The electric perimeter foot switch provides hands free height operation at any point around the length and width of the treatment couch. This system requires light foot pressure on top or beneath the perimeter bar at any point around the couch to activate the height operation. This is ideal for therapists carrying out various manipulations and mobilisations. Available for most couch models including larger versions for Bobath and Mat Table models.

**Perimeter Foot Switch (Bariatric Models)**
The electric perimeter foot switch provides hands free height operation at any point around the length and width of the treatment couch. This system requires light foot pressure on top or beneath the perimeter bar at any point around the couch to activate the height operation. This is ideal for therapists carrying out various manipulations and mobilisations. Available for most couch models including larger versions for Bobath and Mat Table models.

**Foam Wedge**
An aluminium single tier couch mounting step with an integral hand rail for patient support.

**Roll Support Set**
