Note 1: The illustrated fabric colours may vary slightly from actual fabric supplied. This occurs due to the four colour printing process. However every attempt has been made to make them as accurate as possible. Our Policy of continuous improvement means that we reserve the right to change and modify designs without prior notice.

Note 2: Measurements may vary +/- 2" or +/- 5mm due to manufacturing tolerances.
Introduction

In this brochure we cover our range of physiotherapy and rehabilitation products. There is a wide choice of models and accessories to cater for various examination procedures as well as different manual therapy and rehabilitation techniques. Most models are variable in height with a choice of both manual or electric positioning and height operation. The development of these products has been achieved by applying our many years of experience and knowledge in this market. Much thought has been given to the design, to benefit both the comfort and security of the patients as well as providing manual handling solutions which promote good posture and ergonomics to all clinical staff when they are using this equipment. With the management and control of our own assembly line at our premises in Debenham, Suffolk in the UK, our couches comply to the CE medical devices directive 93/42/EEC, ensuring we supply high quality products every time, with short lead times to meet the tightest of deadlines.

Technological Information

At SEERS Medical we are using state of the art design tools, such as 3D solid modelling and in house rapid prototyping, to assist us in getting new designs into development and manufacture. Whilst designing new products, all manufacturing capabilities available are taken into consideration, such as CNC wood cutting, laser profiling and robot welding, which deliver reliable build quality and repeatability of accurate components, time after time. A typical innovative use of these processes is evident in a high loaded components such as the ram bracket, a common item on many SEERS couches, where using laser profiling we have been able to make the parts interlock, adding immense strength, even before welding! This is typical of the attention to detail that we pride ourselves with, and sets us apart from other couch manufacturers, giving us confidence in the reliability and longevity of the products we manufacture.

Mechanical Safety & Load Testing

All SEERS Medical products have been tested to the applicable EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. Our couches have been thoroughly tested with a two and a half times safe working load (n excess of 600Kg) loaded evenly, for in excess of one hour, to prove load support capability without failure. Our products are tested in accordance to Clauses 9.8.3.2-3 Static Forces of EN60601-1:2006 Not only do our products have high safe working loads (typically 240Kg), but our products also lift the rated safe working load from the minimum height to the maximum height smoothly.

Electrical Safety

All SEERS Medical products comply to EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. In addition, the actuation and control systems used on our products are marked with the UL mark, demonstrating compliance to UL60601-1 and CAN/CSA-C22.2 No. 601.1-M90, meeting the requirements for USA and Canada. The actuation control system is also marked with approval to C-ETL-US No. 3154358.

CE Marking & Quality System

SEERS Medical operates a Quality Management System in accredited and approved to ISO 9001:2008. SEERS Medical products comply with the Essential Requirements in Annex I of EC Directive 93/42/EEC, with all relevant design, production records, risk assessments, product testing and labelling information recorded in the documentation file labelled the “Technical File”. All products carry a unique serial number for trace-ability of build date, model number and associated build records.

Flammability

The upholstered couch sections satisfies flammability requirements to the standards of BS 71761995 (medium hazard) using ignition sources 0 (cigarette), 1 (gas) as defined in BS EN. 1921-1 and 2 and 5 (crib) BS 5852:1990.

Warranty

The variable height couches detailed in this brochure have a lifetime frame warranty and five years warranty on all other components.
Therapy 2 Section Standard Head Couch

A very strong and rigid 2 section couch with a wide range of optional accessories available and an extensive choice of colours. This couch is suitable for supporting very heavy patients for examinations, minor procedures and physiotherapy treatments. This 2 section couch is available as a hydraulic or electric model, both models feature a manual backrest that can be adjusted from -25' to +75' and has an excellent height range from 45cm to 98cm.

Models

ST2557 Hydraulic with manual backrest
ST2567 Electric with manual backrest

Standard Features
- Safe working load and lifting capacity of 240Kg (528lbs)
- The power assisted backrest section incorporates anti-trap design gas strut
- Backrest angle adjustment from -25' to +75'
- Choice of hydraulic or electric height elevation
- Excellent height range from 45cm to 98cm
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Breathing hole and plug included as standard
- Purpose made precision bearings on all pivot points
- Clearance beneath frame for mobile hoist
- Hand switch fitted as standard on electric models
- Standard upholstery width of 65cm

Optional Accessories

- 6001 Perimeter Foot Switch
- 6200 Single Foot Switch
- 6339 Dual Foot Switch Operation
- 6006 Upper Limb Support
- 6002 Side Support Rails
- 602P Side Support Rail Cushions
- 6005 Paper Roll Holder
- 6057 Removable Head/Knee Support
- 603 Protective Base Shroud
- 6010 Couch Cover (Breathing Hole)
- 6011 Couch Cover (Without Breathing Hole)

See page 48-55 for additional information on our range of optional accessories and colour options

*When fitted with 9201 Easy Clean Upholstery
Therapy 2 Section Basic Head Couch

Designed for head and neck mobilisation, as well as manual traction techniques, these strong and rigid tables feature a short head section, with the option of adjustable height armrests on the “Plus” model, providing additional patient comfort during prone treatments. The head section has a breathing hole and plug fitted as standard.

Therapy Traction Table

The traction tables have been specially designed for lumbar and cervical traction. They feature an integral rolling top design to facilitate effective traction procedures. The tables are available separately with machine mount or as part of a package with traction machine, flexion stool, all harnesses and neck pillow.

Standard Features

- Safe working load and lifting capacity of 240Kg (528lbs)
- Integral rolling top design to provide effective application of traction forces
- Adjustable height mount for traction machine with offset positioning for changing angle of traction application
- Adjustable angle backrest from horizontal to +80°
- Adjustable angle head/foot section from -25° to +75°
- Head section includes breathing hole and plug
- Power assisted backrest and foot sections incorporate anti-trap design
- Choice of hydraulic or electric height elevation
- Excellent height range from 50cm to 101cm
- Retractable wheel design with adjustable foot for stability on uneven surfaces
- Fixation point for optional cervical traction accessory
- Purpose made precision bearings on all pivot points
- Hand switch fitted as standard on electric models
- Standard width 70cm upholstery

Optional Accessories

- 6200 Single Foot Switch
- 6071 Cervical In Sitting Accessory
- 6046 Pelvic Lumbar Traction Harness
- 6047 Thoracic Harness
- 6048 Thoracic Anchor Straps
- 6049 Cervical Traction Head Halter
- 6067 Cervical Pillow
- 6069 Flexion Stool
- 6070 Spreader Bar
- 6237 Traction Accessory Package

Optional Couch Accessories

**Therapy Positioning Wedge**
A medium density foam wedge for positioning patients. Available in all SEERS vinyl fabrics. The wedge dimensions are 54cm wide, with a base length of 48cm and side tangents of 32cm and 38cm.

**Roll Support Set**
The set comprises of a single roll 30cm long, with a 15cm diameter and a roll 30cm long with a diameter of 20cm that is made up of two half sections. Available in all SEERS vinyl fabrics.

**Long Support Roll**
A medium density foam roll with a choice of SEERS vinyl fabrics to match any couch. The long support roll dimensions are 60cm long with a diameter of 15cm.

**Face Support Ring**
Face support ring for prone treatments. Available in all SEERS upholstery colours.

**Perimeter Foot Switch**
The electric perimeter foot switch provides hands free height operation at any point around the length and width of the treatment couch. This system requires light foot pressure on top or beneath the perimeter bar at any point around the couch to activate the height operation. This is ideal for therapists carrying out various manipulation and mobilisation procedures.

**Couch Cover with Breathing Hole**
These made to measure stretch towelling covers provide an additional hygiene barrier between the patient and the upholstery surface, over time lengthening the life of the couch therapy surfaces. Available in various colours: Royal Blue, Black, Cream, White and Lavender.

**Couch Cover without Breathing Hole**
All covers have elasticated edges and two tie straps for general fitting and security. The covers are available in various colours: Royal Blue, Black, Cream, White and Lavender.

**Electric perimeter foot switch for Bobath and Mat Table models.**

Optional Couch Accessories

- **6007**
  This half moon shaped support is ideal for supporting the head, neck or lower limb during specific treatments.

- **6200**
  Single foot switch option.

- **6239**
  Pair of single foot switches for dual operation.

- **6002 & 6003**
  Fold-down side support rails for 2 & 3 section couches, providing patient support and security.

- **6057**
  Battery back-up available for most electric operated models.

- **6207**
  Double foot switch option (alternative to standard double hand switch).

- **6002P & 6003P**
  Upholstered cushions can be added to the side support rails for additional comfort, support and protection.

- **6053**
  An easy to clean moulded base shroud that covers all the moving parts of the base frame.

- **6005**
  The paper roll holder provides a protective barrier between the patient and the upholstered surface.

If you have any queries on any of the optional accessories listed above please contact us for further details. Please note some of the accessories are supplied as standard with specific couches so please ensure you check before purchasing your chosen product as all other options come at an additional cost.
